

ATTENDANCE MATTERS

Missing a day of school here and there may not seem like much, but absences add up!

When a student misses **2** days a month..

They will miss 20 DAYS a year.

They will miss 30 HOURS of math over the school year.

They will miss 60 HOURS of reading & writing over the school year.

They will miss over 1 YEAR of school by graduation.

When a student misses **4** days a month..

They will miss 40 DAYS a year.

They will miss 60 HOURS of math over the school year.

They will miss 120 HOURS of reading & writing over the school year.

They will miss over 2 YEARS of school by graduation.

TARDINESS

Being tardy to class can negatively affect a student's academic performance by causing them to miss important information at the beginning of lessons, disrupt the learning flow for other students, and potentially lead to lower grades, especially if tardiness becomes a frequent habit; it can also contribute to feelings of disconnection from school and potential behavioral issues.

Key impacts of tardiness on students:

Missed instruction:

Students arriving late may miss crucial introductory information, explanations, or important concepts presented at the start of a lesson, hindering their understanding of the material.

Classroom disruption:

Entering a class late can disrupt the learning environment by drawing attention away from the teacher and causing distractions for other students.

Lower academic achievement:

Studies have shown a correlation between frequent tardiness and lower grades, lower standardized test scores, and increased risk of failing classes.

Social isolation:

Students who are often late might feel disconnected from their peers and miss out on social interactions within the classroom.

Behavioral issues:

Chronic tardiness can sometimes be linked to more significant behavioral problems and increased disciplinary issues.

EARLY RELEASE

Leaving early on a continual basis can negatively affect a student's academic performance by causing them to miss important information, disrupt the learning flow for other students, and potentially lead to lower grades, especially if leaving early becomes a frequent habit; it can also contribute to feelings of disconnection from school and potential behavioral issues.

Key impacts of early release on students:

Missed instruction:

At OEN, instruction occurs from bell-to-bell. Students are still learning and by continually leaving early, missing valuable information.

Classroom disruption:

Leaving a class early disrupts the learning environment by drawing attention away from the teacher and causing distractions for other students.

Lower academic achievement:

Studies have shown a correlation between frequent early dismissals and lower grades, lower standardized test scores, and increased risk of failing classes.

Please help us provide the best academic experience we can by only picking up your child early when absolutely necessary.

Thank you.
